

Bookkeeping

Fuga shows a practical overview of unpaid invoices and receipts, late payers and outstanding accounts.

Practices with a single bookkeeping can do their full accounting in Fuga: VAT returns, list of VAT-obliged customers, ledger accounts, cash book, etc. For companies, Fuga can export the necessary data (new customers, outgoing invoices, etc.) to the bookkeeper's accounting package in order to keep your bookkeeper's invoice under control.

Fuga allows an easy creation of credit notes, invoices, receipts and payment reminders with possible file costs. Invoices can be personalized with your own logo and you can decide how services appear on the invoice.
